

**CCTV, ACCESS CONTROL &
INTEGRATED SECURITY SOLUTIONS**

DigitFMS

**EMPOWERING SECURITY EXCELLENCE
THROUGH INNOVATIVE SOLUTIONS**

DigitFMS is a national security technology provider delivering high-performance CCTV, access control, alarms and integrated monitoring solutions across South Africa. We combine proven engineering discipline with modern A.I-driven technology to give clients security infrastructure they can trust - day in, day out.

Since 2007, **DigitFMS** has been at the forefront of **cutting-edge security and asset management solutions** across Southern Africa. Our commitment to innovation, reliability, and customer satisfaction has established us as a trusted partner in the security industry.

We specialise in **advanced mobile and fixed asset tracking solutions** that are designed to **enhance operational efficiency, reduce risk, and maximise security** for businesses and individuals alike.

At **DigitFMS**, we specialise in advanced **fleet management, driver behaviour monitoring, and real-time GPS tracking solutions** tailored for businesses across Africa. Our cutting-edge, **AI-powered CCTV systems and intrusion detection technology** offer unmatched surveillance and security for both **mobile fleets and fixed assets**.

With a network of over **100 franchises** and a rapidly expanding footprint across the continent, Digit FMS is your trusted partner in delivering reliable, innovative, and scalable security solutions that protect what matters most.

MISSION

TO PROTECT AND EMPOWER OUR CLIENTS BY PROVIDING CUTTING-EDGE SECURITY SOLUTIONS, FOSTERING LASTING RELATIONSHIPS, AND ENSURING HASSLE-FREE EXPERIENCES.

VISION

TO REDEFINE SECURITY STANDARDS IN SOUTHERN AFRICA BY DELIVERING EXCEPTIONAL, TAILORED SOLUTIONS AND UNPARALLELED CUSTOMER EXPERIENCES.

OUR VALUES

We're a hands-on, highly skilled team of security technicians, project managers and systems engineers operating through multiple branches countrywide. Our reputation is built on reliability, loyalty, and a simple promise: **deliver a system that works flawlessly when it matters most.** Clients trust us because we show up, we know our craft, and we stand behind every installation.

INNOVATE AND ELEVATE

We relentlessly pursue forward-thinking solutions, harnessing cutting-edge technology to outpace emerging threats and deliver unmatched protection for our clients' assets.

PROTECT AND SERVE

We put the safety and security of our clients, their assets, and their people at the heart of everything we do—protecting what matters most, always.

COLLABORATIVE EXCELLENCE

We cultivate a dynamic culture built on collaboration, expertise, and transparent communication, empowering our teams to deliver exceptional results and innovative solutions that exceed client expectations.

INTEGRITY AND TRANSPARENCY

Responsive & Reliable – We uphold the highest standards of integrity, transparency, and accountability, ensuring every interaction builds trust, delivers value, and strengthens lasting partnerships.

CUSTOMER CENTRICITY

We put our clients at the centre of every decision, delivering tailored solutions and exceptional service that drive results, build trust, and create lasting value.

PROACTIVE AND RESPONSIVE

We proactively anticipate evolving security threats and respond instantly, delivering seamless, uninterrupted protection you can trust.

INTRODUCTION

In an increasingly dynamic and security-conscious world, safeguarding residential and commercial properties has never been more critical. As the demand for effective surveillance grows, advanced Closed-Circuit Television (CCTV) systems have become essential tools for monitoring and protecting assets.

At **DigitFMS**, we deliver **state-of-the-art CCTV** security solutions designed to meet the unique surveillance requirements of every client. Our intelligent systems provide **real-time monitoring, crime deterrence, and enhanced situational awareness**, ensuring your people and property remain protected around the clock.

Our expertise encompasses the integration of advanced surveillance systems with 24/7 off-site monitoring, ensuring comprehensive protection for your assets.

ADVANCED AI-POWERED SURVEILLANCE SOLUTIONS FOR ULTIMATE SECURITY

Protect your business and property with DigitFMS's state-of-the-art CCTV surveillance and access control systems. We don't just install cameras - we provide end-to-end security solutions including expert consultation, professional supply, seamless installation, and ongoing maintenance tailored to your unique security needs.

PRODUCT AND TECHNOLOGY REVIEW

DigitFMS works with all major CCTV brands - Hikvision, Uniview, Axis, and others - but we proudly specialise in **Dahua Technologies**, leveraging their advanced A.I analytics, intelligent tracking, and high-performance camera ranges.

Our solutions include:

- **A.I-Enabled CCTV Systems** - object detection, perimeter analytics, vehicle tracking, person identification, barcode capture, behaviour analysis
- **State-of-the-Art Control Rooms** - designed, built and fully integrated for large-scale operations
- **Dahua Facial Access Control** - seamless, fast, and secure biometric access for staff and visitors
- **Ajax Wireless Alarm & Automation Systems** - smart intrusion detection, fire protection, and home/office automation
- **Advanced Networking & Fibre Infrastructure** - switching, routing, dark-fibre links, redundant communications
- **Integrated Security Dashboards** - pulling CCTV, access, alarms and analytics into one unified view

Every system is engineered to be stable, scalable, and future-proof - something our clients genuinely appreciate.

WE PROVIDE SOLUTIONS TO EVERYDAY SURVEILLANCE CHALLENGES

KEY FEATURES

Equipped with up to 4K resolution cameras, our system provides crystal-clear images and video, ensuring no detail is missed.

NIGHT VISION TECHNOLOGY

Intelligent motion sensors trigger alerts to notify users of any unusual activity, allowing for a swift response.

CLOUD STORAGE AND ACCESS

Compatible with smart home systems and devices, providing users with a comprehensive security solution.

WEATHERPROOF AND DURABLE DESIGN

Smart motion detection for human and vehicle recognition.

REMOTE MONITORING

Cameras with built-in siren and flashing lights to deter intruders.

1

HIGH-DEFINITION VIDEO QUALITY

2

Advanced infrared sensors allow for clear visibility in low-light conditions, ensuring 24/7 surveillance.

3

MOTION DETECTION AND ALERTS

4

Secure cloud storage options enable users to access recorded footage remotely from any device with internet connectivity.

5

INTEGRATION WITH SMART DEVICES

6

Cameras are built to withstand various weather conditions, ensuring longevity and reliability.

7

AI-POWERED ANALYTICS

8

Access live footage anytime, anywhere via a secure mobile app.

9

ACTIVE DETERRENCE

BENEFITS

- **Enhanced Security:** The system offers continuous surveillance, deterring potential intruders and providing evidence in case of incidents.
- **User-Friendly Interface:** An intuitive app allows users to easily navigate and control the CCTV system from their smartphones or computers.
- **Cost-Effective Solution:** By reducing the need for physical security personnel, the CCTV system offers an economical way to maintain security.
- **Scalability:** The system can be scaled to accommodate various property sizes, from small homes to large commercial complexes.

TARGET MARKET

- **Real-Time Security Alerts:** Receive instant notifications for unauthorised access or suspicious activity to safeguard your premises 24/7.
- **Advanced Access Control:** Utilize AI-powered facial recognition to monitor and control building entry, enhancing security and convenience.
- **Boost Employee Productivity:** Leverage AI-driven video analytics to identify operational inefficiencies and optimise workplace performance.

INDUSTRIAL & WAREHOUSING AI APPLICATIONS

- **Enhanced Perimeter Security:** AI cameras continuously monitor communal areas and boundaries, offering homeowners peace of mind.
- **Smart Package Detection:** Get alerts for delivered packages to prevent theft or unattended parcels.
- **Seamless Visitor Management:** Facial recognition technology manages access and logs visitor data for enhanced community security.

RETAIL STORE AI ADVANTAGES

- **Real-Time Security Alerts:** Receive instant notifications for unauthorised access or suspicious activity to safeguard your premises 24/7.
- **Advanced Access Control:** Utilize AI-powered facial recognition to monitor and control building entry, enhancing security and convenience.
- **Boost Employee Productivity:** Leverage AI-driven video analytics to identify operational inefficiencies and optimise workplace performance.

SMART TRAFFIC MANAGEMENT POWERED BY AI

AI SOLUTIONS FOR COMMERCIAL PROPERTIES

- **Intrusion Detection Systems:** Detect unauthorised entry into restricted zones instantly and trigger immediate security alerts to prevent breaches.
- **Asset Protection & Monitoring:** Secure valuable equipment and inventory with continuous AI surveillance for loss prevention.
- **Operational Efficiency Insights:** Use AI analytics to streamline workflows, improve safety protocols, and reduce downtime.

AI-POWERED SAFETY FOR RESIDENTIAL COMMUNITIES

- **Real-Time Loss Prevention:** Monitor customer behaviour with AI analytics to detect and prevent theft before it happens.
- **Customer Foot Traffic Insights:** Analyse store traffic patterns to optimize layouts, improve marketing strategies, and boost sales.
- **Staff Compliance & Service Monitoring:** Track employee activities to ensure policy adherence and enhance customer service quality.

AI IN HIGH-RISK & SECURITY-SENSITIVE AREAS

- **Optimised Traffic Flow:** AI video analytics monitor vehicle and pedestrian traffic to reduce congestion in busy urban areas.
- **Real-Time Incident Detection:** Detect accidents, illegal parking, and traffic violations instantly for faster response.
- **Automated Vehicle Recognition:** Implement license plate recognition for automated toll collection and secure access control.
- **Traffic Congestion Solutions:** Gain actionable insights into traffic patterns to improve road management and minimise bottlenecks.

VS

ANALOG CAMERA

ANALOG CCTV SYSTEM

These traditional systems use coaxial cables to transmit video to DVRs, offering reliability but lower resolution and limited features.

- Uses coaxial cables, limiting flexibility and long-distance installation.
- Generally, lower resolution compared to IP systems, but still provides effective surveillance.
- Suitable for small to medium-sized properties with basic security needs.

IP CAMERA

IP CCTV SYSTEM

These modern IP cameras transmit digital video to NVRs, offering high resolution, smart features, and easy scalability.

- Uses network cables or Wi-Fi for easy scalability and modern integration.
- Low power consumption and high performance.
- Ideal for large properties, high-security areas, and remote monitoring.

WHEN TO CHOOSE IP OVER ANALOG

- If high-resolution footage is required for identification purposes (e.g., entrances, cash handling areas, or restricted access zones).
- If scalability is necessary-IP cameras can be easily expanded without replacing major infrastructure.
- If remote access and smart analytics are a priority for security management.
- If the installation area requires long-distance coverage, as IP systems allow more flexible cabling and wireless options.

COST CONSIDERATIONS:

- Analog systems are cheaper per camera and DVR unit, but installation may be more complex due to extensive cabling.
- IP systems have a higher initial cost but provide long-term savings through better coverage, fewer cameras needed, and lower maintenance.
- The decision should factor in future expansion, image quality needs, and network capabilities.

INTRODUCTION TO OFF-SITE MONITORING

Off-site monitoring involves the real-time surveillance of your property by security professionals located at a remote monitoring center. Utilizing advanced CCTV systems, live video feeds are transmitted to these centers, where trained personnel oversee activities and respond promptly to any suspicious events. This approach ensures that your residence or business is under constant watch, even when you're not physically present.

ALWAYS WATCHING, ALWAYS PROTECTING

In today's world, protecting your assets isn't just about reacting to incidents – it's about preventing them. DigitFMS Off-Site Monitoring delivers 24/7 professional surveillance without the high costs and risks of relying solely on on-site security guards. Using state-of-the-art cameras, motion sensors, and AI-driven analytics, our trained security specialists monitor your property in real-time—ready to take immediate action at the first sign of trouble.

BENEFITS

Your property is monitored 365 days a year, day and night. 24/7 Surveillance: Continuous remote monitoring ensures all activities are observed, detecting and addressing incidents even after hours.

INSTANT RESPONSE TO THREATS

Proactive monitoring spots threats before they escalate.

COST-EFFECTIVE, HIGH-COVERAGE SECURITY

Works with your existing alarms, CCTV, and access control systems. Advanced Technology Integration: Off-site monitoring uses advanced tech like AI, motion detection, and real-time alerts for precise threat detection.

SCALABILITY AND FLEXIBILITY

Knowing that experienced security professionals are continually monitoring your property allows you to focus on other priorities without compromising safety.

REMOTE ACCESS

No matter where you are, we've got eyes on your assets.

1

UNINTERRUPTED, ROUND-THE-CLOCK PROTECTION

2

Suspicious activity, trespassing, or break-ins trigger immediate action. Immediate Action: Trained personnel quickly assess threats, contact authorities, and issue warnings to prevent escalation.

3

AI-POWERED EARLY DETECTION

4

Reduce security costs without reducing protection. Off-site monitoring delivers full security coverage at a fraction of the cost of on-site staff. Lower Insurance Costs: Enhanced security reduces risk, leading to potential savings on insurance premiums.

5

SEAMLESS SYSTEM INTEGRATION

6

These systems can be tailored to fit the specific needs of your property, allowing for easy adjustments and scalability as your security requirements evolve.

7

PROFESSIONAL OVERSIGHT

8

Property owners can access live footage through secure mobile applications or web platforms, providing reassurance and the ability to monitor their premises from anywhere in the world.

9

NATIONWIDE MONITORING CAPABILITIES

PROJECTS WE DELIVER

DigitFMS works across logistics, industrial, commercial, retail, residential and public-safety sectors.

OUR PROJECT EXPERIENCE INCLUDES:

- **Large logistics hubs and distribution centres** - hundreds of cameras, barcode-scanning A.I setups, full-fibre backbones
- **Corporate and industrial facilities** - integrated CCTV + facial access + alarm solutions
- **Residential estates and complexes** - perimeter systems, LPR, facial access, and command-centre monitoring
- **Public-space surveillance** - roadside camera clusters for safety and municipal monitoring
- **Full alarm and monitoring deployments** – Ajax systems with automation and mobile-app integration

Our installations scale from 10-camera SME setups right through to 800+ camera enterprise deployments with customised control rooms.

SUCCESS CASE STUDIES

SUCCESS CASE STUDY

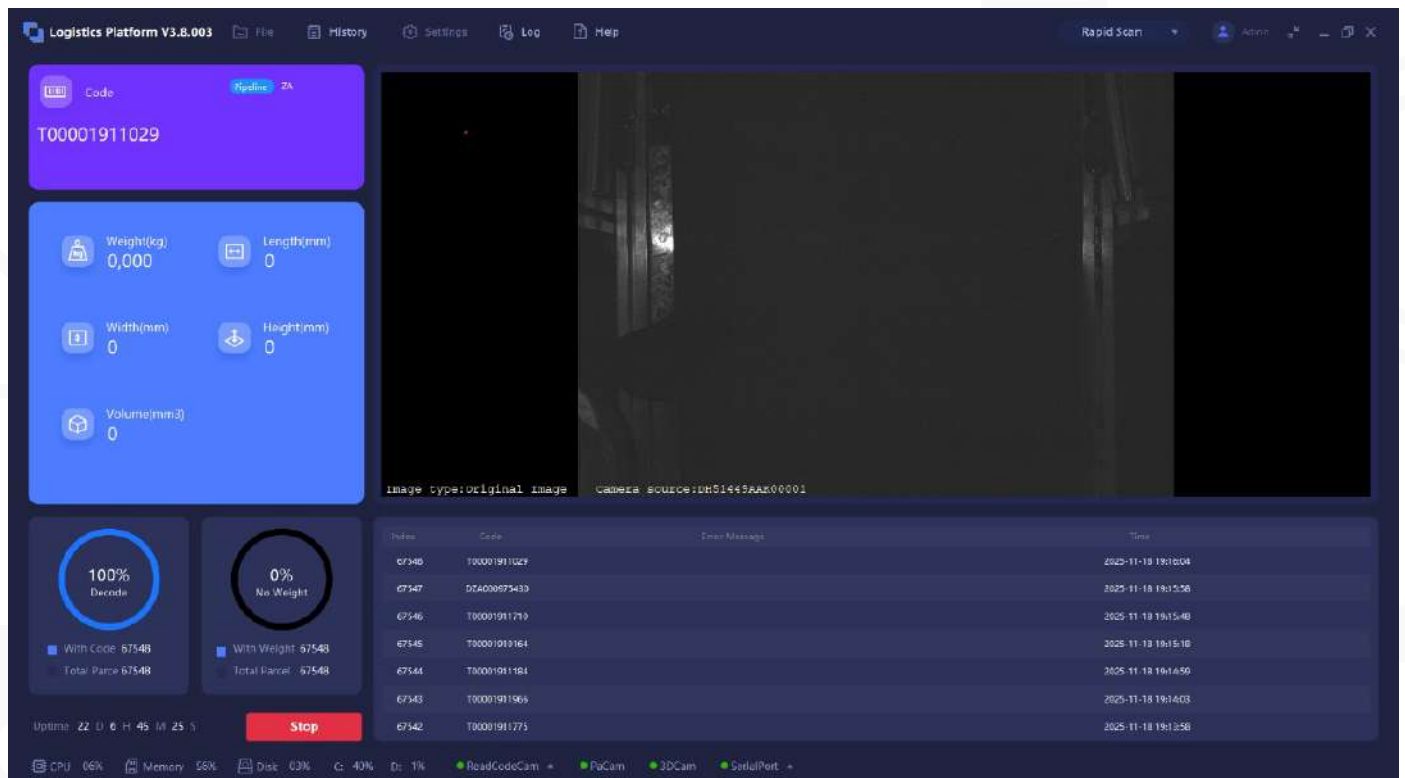

CASE STUDY 1: CEVA LOGISTICS – AI BARCODE SCANNING AND VERIFICATION

DigitFMS became the first company in South Africa to deploy a dedicated barcode-scanning and image-capture camera system within a live logistics environment. Using the iRayple R7201MG-OOC-NGG01E industrial camera, our engineering team designed and installed a high-speed visual verification system above CEVA Logistics' outbound conveyor lines.

This innovation enables CEVA to:

- Verify every order leaving the conveyor with timestamped video and barcode data.
- Prove packing and dispatch accuracy in real time.
- Reduce human error and disputes through synchronized video-data auditing.

This project positioned **DigitFMS** as a national pioneer in intelligent machine-vision technology, merging logistics, CCTV, and automation into one reliable quality-control layer.

SUCCESS CASE STUDY

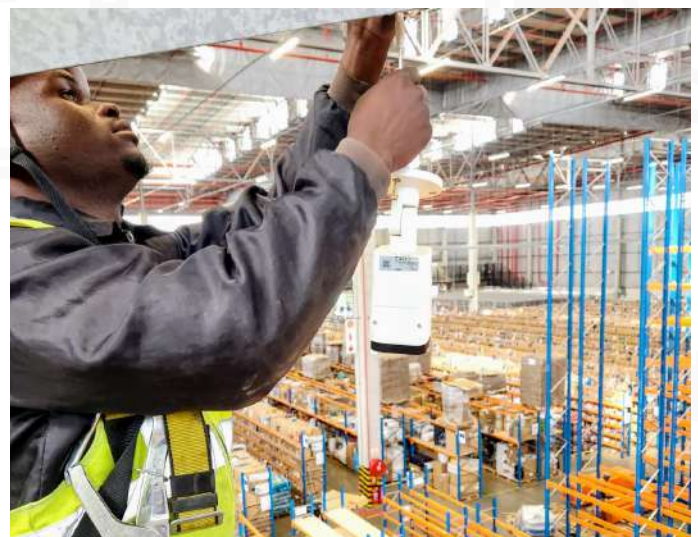

CASE STUDY 2: AMAZON SOUTH AFRICA – MULTI-SITE AI SURVEILLANCE, ACCESS CONTROL & WIRELESS ALARM INTEGRATION

DigitFMS delivered one of the largest private security technology deployments in South Africa across Amazon's Johannesburg and Cape Town distribution facilities, with KwaZulu-Natal scheduled for completion in 2026.

Our scope included:

- Over 800 Dahua AI cameras, offering advanced analytics, perimeter protection, and intelligent tracking.
- A fully redundant fiber-optic and networking backbone with enterprise-grade firewalls for secure, high-bandwidth operation.
- Facial-recognition access control throughout the facility to manage and record personnel movement.
- A state-of-the-art control room engineered for continuous, real-time monitoring.
- A complete Ajax wireless alarm system with more than 100 devices, providing multi-zone intrusion detection and system redundancy across all operational zones.

This multi-site implementation provides Amazon with unparalleled situational awareness, safety, and operational control, setting a new benchmark for intelligent facility security in South Africa.

SUCCESS CASE STUDY

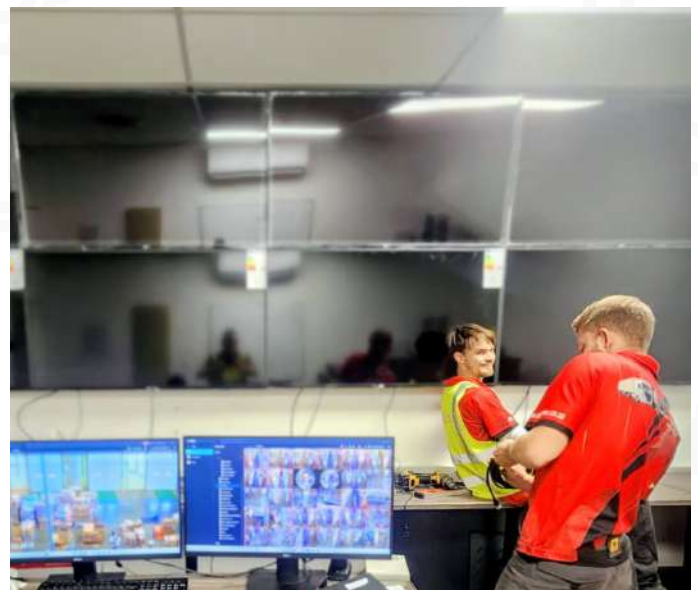

CASE STUDY 3: SUNNINGHILL RATEPAYERS ASSOCIATION (SUNCOM) - PUBLIC SAFETY SURVEILLANCE NETWORK

DigitFMS holds an active Service Level Agreement (SLA) with the Sunninghill Ratepayers Association (SUNCOM), providing installation, maintenance, and monitoring of a comprehensive camera network across public roads and intersections.

The system consists of multiple high-definition camera clusters, all connected via a dark-fiber network, delivering:

- Continuous public-safety monitoring for residents and commuters.
- Real-time response capability in coordination with local security providers and law enforcement.
- Preventative surveillance to reduce crime, improve traffic safety, and increase community confidence.

This partnership highlights Digit FMS's commitment to community-level security innovation, ensuring advanced technology directly contributes to safer, smarter neighbourhoods.

WHY CHOOSE US

Choosing **DigitFMS** means partnering with an industry leader in asset management and security—a brand trusted by businesses nationwide. Driven by innovation and a commitment to excellence, we deliver cutting-edge technology, unmatched reliability, and measurable cost savings. Our customer-first approach ensures every solution is tailored for maximum efficiency, protection, and value. **DigitFMS** is built on old-school work ethic backed by modern A.I intelligence - a combination that keeps our clients protected and our systems performing long after everyone else has packed up their ladders.

NATIONAL FOOTPRINT

With installation teams across the country

DEEP TECHNICAL EXPERTISE

In A.I-driven surveillance and access control

FAST SUPPORT

And dedicated after-sales service

LONG-TERM PARTNERSHIPS

Not once-off installations

RELIABLE, LOYAL AND CONSISTENT

The type of vendor you keep for years, not months

FLEXIBLE FINANCING OPTIONS

We offer flexible, tailored financial solutions that remove cost barriers—making it simple for businesses to access and benefit from our advanced technology without straining their budget.

SEAMLESS INTEGRATION

All our solutions integrate seamlessly into a single, powerful platform—streamlining asset management, maximising efficiency, and unlocking peak performance across your entire operation.

EXPERT SUPPORT

Our expert team is committed to delivering exceptional, round-the-clock support, ensuring your assets remain protected, monitored, and performing at their best. With Digit FMS, you gain a trusted partner who keeps your operations secure, efficient, and worry-free.

PROVEN RELIABILITY

With a network of over 100 franchises across Africa, DigitFMS is a trusted industry leader in innovative asset management and advanced security solutions, delivering proven protection and performance to businesses of all sizes.

CUTTING-EDGE TECHNOLOGY

Our solutions combine state-of-the-art GPS tracking, AI-driven surveillance, and advanced fuel management to deliver unmatched security, precision monitoring, and real-time insights—empowering you to protect assets, boost efficiency, and stay in complete control.

COMPREHENSIVE SOLUTIONS

We provide a fully integrated suite of asset management solutions that safeguard both mobile and fixed assets. Our advanced technologies deliver unmatched protection, streamline operations, and maximise efficiency—ensuring your business runs smarter, safer, and more profitably.

FUTURE VISION & ROADMAP

At **DigitFMS**, our vision is clear—to shape a smarter, safer, and more connected future for businesses worldwide. We're committed to:

- Expanding globally, taking our proven solutions beyond Africa to new markets.
- Advancing AI innovation to deliver next-generation predictive analytics.
- Driving sustainability through eco-friendly technologies that support responsible business practices.

As we look to the future, our mission remains steadfast: to lead the evolution of asset management and security solutions. By combining cutting-edge technology, intelligent insights, and a forward-thinking approach, we empower businesses to operate with greater control, efficiency, and confidence—no matter where they are in the world.

COMPREHENSIVE SUPPORT & CENTRALIZED MANAGEMENT

WHERE EFFICIENCY MEETS UNMATCHED RELIABILITY

At **DigitFMS**, our 24/7 Centralised Control Room is the nerve centre of our operations—delivering constant, expert monitoring of your assets. By integrating real-time data from multiple systems, we ensure rapid incident response, proactive threat management, and the peace of mind that your assets are always protected.

Beyond world-class monitoring, Digit Finance empowers businesses to access the latest technology without financial strain. From flexible equipment financing and rental programmes to seamless upgrade plans, we make it easy to stay ahead with cutting-edge solutions.

This powerful combination of state-of-the-art control and tailored financing sets **DigitFMS** apart—providing every client with exceptional support, maximum efficiency, and the confidence to operate without compromise. With **DigitFMS**, you gain more than a service provider—you gain a strategic partner in security and asset management.
